

NEWSLETTER SUSTAINABILITY COMMITTEE

OCT
'22

The sustainability committee of Groenhoven works towards a sustainable future for our building complex, with the goal of stabilizing the costs. We very well understand that now is the time to take action as a collective to keep the monthly costs affordable for everyone.

WHAT'S THE LONG TERM PLAN?

At this moment, an **investigation** is ongoing to explore the possibilities to make Groenhoven more sustainable for the long term. For example, (alternative) heat sources, isolation and financing. We expect to present different **scenarios/packages** to the residents of Groenhoven early next year.

In this case, we ask everyone to vote. **Voting** is possible at the presentation in person or when authorized by someone else via a power of attorney. It is essential that a majority of the owners is present and/or votes. More details will be shared with you in the near future.

WHAT IS THE SHORT TERM PLAN?

The sustainability committee will share **tips & tricks** in order to enable you to take measures for sustainability and to reduce costs. All small steps and measures can have a great (positive) impact on the collective and its monthly payments. Think about applying radiator foil or draft strips, but also about awareness when turning on the radiators.

Subsequently, small alterations can have a great effect like taking shorter showers. These tips & tricks are shared with you through posters in the hall of every tower, a newsletter (like this one) and during activities of the collective.

Scan the poster in the hall of your tower with Google Translate and use your camera

FAQ

Every newsletter will highlight 2 of the most frequently asked questions from Groenhoven residents. Do you also have a question? Send us an email.

We would like to install double glazing in our house in the short term. Is it wise to wait a little longer until there is a plan from the Sustainability Committee?

We advise you to wait with this until more is clear about the (previously mentioned) scenarios. It is possible that isolation of the building and individual homes is included in the proposal.

When can we vote?

We expect to be able to present the scenarios early next year. Then you can vote immediately (after the presentation).

WHAT DO YOU THINK OF SUSTAINABILITY?

We are curious on your view about making Groenhoven sustainable. You could help us by answering these 10 short questions over your cup of coffee or tea. **This can be done anonymously.**

Thanks in advance!

WHO ARE WE?

We are a group of volunteers and residents of Groenhoven who are driven to make Groenhoven more sustainable. We believe that by taking action together now, living comfort can be improved and costs stabilized. By doing it together, we can apply for subsidies and share knowledge.

Do you want to help us make Groenhoven more sustainable? We are still looking for volunteers for our activation working group. An instruction evening will be organized for this later this year. Send your email to:
