

# NEWSLETTER SUSTAINABILITY COMMITTEE

DEC  
'22

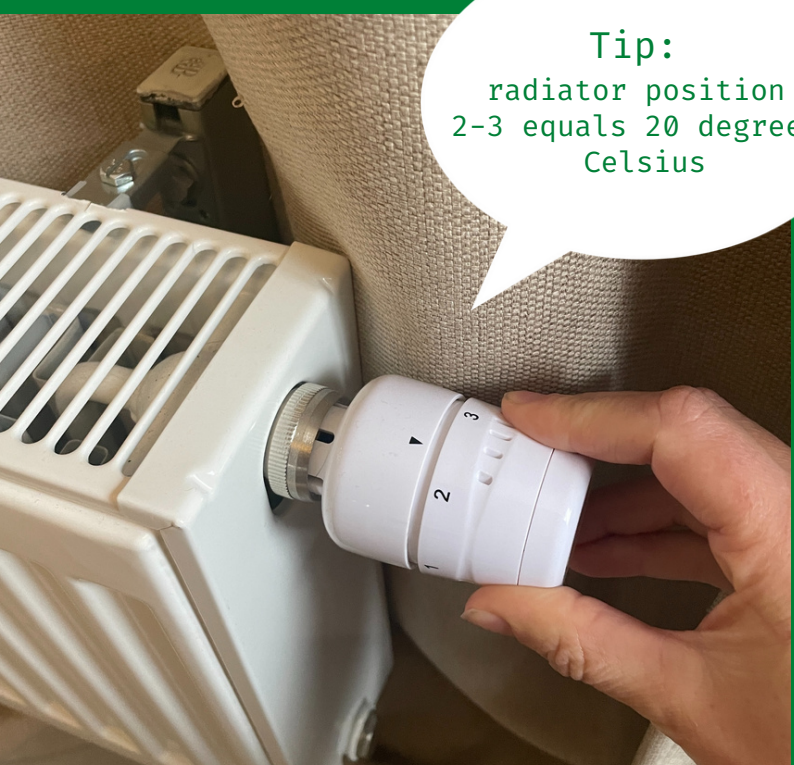

The sustainability committee works on a sustainable future for Groenhoven. Our goal: stabilizing costs. On November 24 this year, we organized an informational evening for residents of Groenhoven, discussing the possibility of making your home more sustainable on the short term. We did this in cooperation with the !Woon foundation and energy expert Baudouin.

[WATCH MEETING](#)

**SUMMARY INFORMATIONAL EVENING >>**

## LOW BUDGET SUSTAINABILITY MEASURES

There are multiple options to make your home more sustainable. For instance, with energy saving products provided with a free energy consultation from the !Woon foundation. See the bottom right corner of this page to sign up for this.

Tip:  
radiator position  
2-3 equals 20 degrees  
Celsius

## CONSCIOUS USE OF HEAT & GAS

The bottom line of the informational evening was to become conscious of the use of heat. Turn off your radiators when away from home or when you are going to sleep. Use radiator foil, hang up curtains that keep the cold away and have shorter (and cold) showers.

## WE DO IT TOGETHER AS A COLLECTIVE

Because we do not use individual heat meters, we collectively pay the costs. Therefore it is important that we do this together by making ourselves and our neighbors aware of energy saving products and measures. Notify your neighbors about the free energy consultation and the sustainability committee.

## YOUR VOICE IS NEEDED FOR BIG SUSTAINABILITY STEPS

We are aware that the best way to make our homes more sustainable is through major measures like isolation, heat sources, etc. This process is ongoing as we speak. In 2023 we need your voice to implement these major measures in order to stabilize our costs.

# WHAT IS THE STATUS OF THE LONG TERM PLAN?

At the moment a major study is being conducted in order to explore the possibilities of making Groenhoven more sustainable in the long term. This includes (possible) heat sources, isolation and funding. **Currently we have received multiple (results of) investigations** and are exchanging information with Gouden Leeuw.

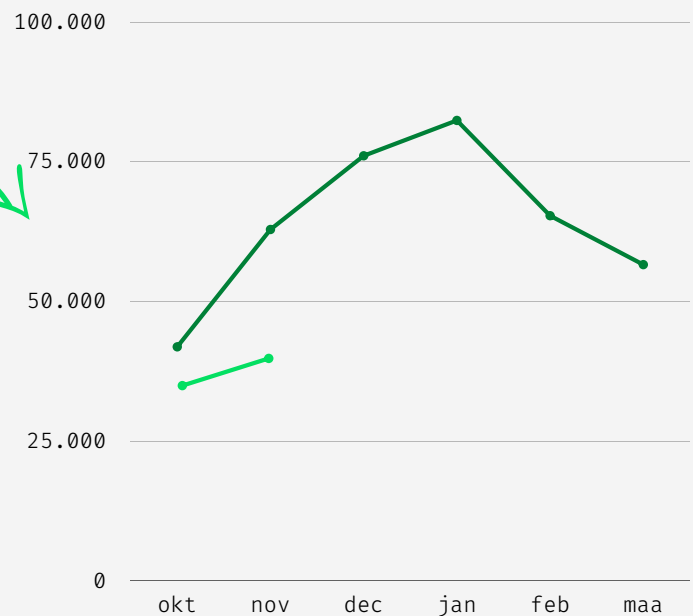

**Early 2023 we will present multiple scenarios to all Groenhoven residents.** Then we would like to ask everyone to vote. The moment we have to vote about the sustainability measures is coming near. Talk about this with your neighbors and share your views and questions with us via: [verduurzaming@vvegroenhoven.nl](mailto:verduurzaming@vvegroenhoven.nl)

## REAL TIME GAS CONSUMPTION

In every newsletter we will give you an update on our collective gas consumption. You can see that we are already more economical compared to last year. Well done!

## FAQ

Every newsletter we highlight two of the most asked questions from Groenhoven residents. Do you also have a question? Send us an email: [verduurzaming@vvegroenhoven.nl](mailto:verduurzaming@vvegroenhoven.nl)

### What can I do to contribute to sustainability?

You can follow our tips, like installing energy saving products and conscious use of heat. In addition, we are still looking for volunteers for our activation committee to make as many people as possible aware of the long-term plan. E-mail us if you are interested!

### What if my neighbor does not save on gas or warm water?

That would be a pity, because we have to do this as a collective. Therefore, tell your neighbors about our committee and tips. In this way, we can save and stabilize costs.

[In order to inform everyone as well as possible, we need information from residents. Share information with us here.](#)
